

Lab 1

Tasks/Assignments(s)

For each of the following problems: Fill the following IPO chart (along with pseudocode) and draw the flowchart that represents its logic. Then write a C++ program for that task.

Task#1 Problem:

Create a program that allows the user to enter two values. The program outputs the product of the two values.

<u>Input</u>	<u>Processing</u>	<u>Output</u>
First value, Second value	Processing items: Product= First value * Second value <u>Algorithm:</u> Step 1: Start Step 2: Enter First value, Second value Step 3: Calculate Product = First value * Second value Step 4: Print Product Step 5: Stop	Product

Flowchart
